

Stephanie Tu, Undergrad, Mechanical Engineering (aerospace) / future Boeing employee

## Why Join SWE as a collegiate member?

### YOUR COMMUNITY

Getting an engineering degree can be isolating, but with a SWE membership you are not alone. Joining SWE gives you an automatic network of colleagues with similar experiences, challenges, and goals. Many current SWE members credit joining SWE in college as the reason they stuck with—and succeeded in—their STEM programs. You'll also have the opportunity to meet and network with practicing engineers who can provide advice, guidance and real-world career connections.

### JOB & CAREER

SWE hosts the world's largest career fair for women in engineering; as a SWE member, you have unlimited career fair access. Not able to make it to Annual Conference? We also host smaller job fairs through our seven WE Local events around the globe. You can also post your resume and search the over 10K open positions on SWE's Online Career Center. SWE partners with leading organizations who are committed to working towards gender parity in engineering and technology.

### SWE SCHOLARSHIPS

#### MORE THAN \$800,000 AWARDED EACH YEAR

SWE is proud to be the largest resource of scholarships for women in engineering. SWE scholarships financially support women pursuing STEM degrees and are open to all candidates who identify as female.

### SAVE WITH C2C

The Collegiate-to-Career membership at SWE offers huge savings. With a one-time payment for membership of \$50, you'll be a SWE member for your entire student career plus your first year as a professional. Since an annual SWE membership is \$20 a year for undergrads and \$50 as an early professional, the C2C membership pays for itself quickly.

*As a champion of diversity, SWE both empowers women and allies to succeed as engineers and technologists and inspires the next generation of leaders in STEM.*

## CONFERENCES & COMPETITIONS

Engage, network, present, and learn at SWE's **WE Annual Conferences** or our **WE Local events**. While our Annual Conference is the largest event of its kind for women in engineering, our WE Local events offer more intimate experiences. SWE events feature engineering career fairs, educational sessions, and pivotal networking opportunities. We also have a wide variety of collegiate competitions and challenges to recognize your engineering talent!

## SWE LEADERSHIP

We know how tough it can be to build up an impressive resume during college—one that will be noticed by potential employers and hopefully land you that promising internship or dream job. SWE has plenty of opportunities that will add standout experience to your resume. Hone your capacity as a leader by getting involved with your local SWE Section or Affiliate, serving on a SWE Committee, or volunteering for a K-12 Outreach event.

## EDUCATION & INSIGHT

As a SWE member, you are connected to free educational resources and groundbreaking insights. Access SWE thought-leadership and earn CEUs through our webinars and e-learning courses through SWE's **Advance Learning Center**. Read and listen to the latest diversity and inclusion practices with SWE's daily digital blog, *All Together*, SWE's **award-winning print magazine**, *SWE Magazine*, and SWE's **podcast series**, *Diverse*. **SWE's research site** also provides current, original research on the state of women in engineering.

## SWE ADVOCACY

As a SWE member, you join with the leading advocacy voice for women in the profession. SWE advocates for girls through K-12 outreach programs, for the full implementation of Title IX in federally funded programs, and for equitable and family friendly practices within the STEM workforce. Given the gender disparity within the engineering and technology field, it is imperative that SWE leads advocacy efforts to work towards parity.
