

Aishwarya Vaidyanathan,
Biomedical Engineer
(Member Since 2010)

Why Join SWE as a global member?

SWE is proud to be a global organization of diverse individuals.

YOUR COMMUNITY

Your community is critical to your persistence in engineering. Being one of SWE's 40,000+ members reminds you that you're not the only one. There are other amazing women out there who have been in your shoes—women you can turn to for motivation and support. As a member, these women become your "SWEsters" and are there to help you along your engineering journey, no matter where in the world that may be!

GROWTH

SWE has plenty of opportunities to help you grow as a professional and become a better leader. Leverage 200+ professional development webinars on a variety of topics for personal and professional growth through SWE's **Advance Learning Center**. Localized versions of SWE's annual conference - **WE Local** - offers educational sessions, pivotal networking opportunities, engineering career fairs and outreach events. Serving on your section's board, speaking at events and volunteering at STEM outreach programs are other ways to strengthen your leadership qualities.

OPPORTUNITIES

Get involved, no matter where you're located. SWE **Global Affiliate** status gives your group the opportunity to utilize the name of the Society for group functions and permits members to apply for individual awards and program development grants. The **SWE Global Ambassador program** allows members who reside outside the United States to serve in a SWE leadership position for their city, country, region and the Society.

KNOWLEDGE

Keep up on issues of interest to women engineers everywhere with our daily digital blog, *All Together*—which includes articles from our **award-winning print magazine, SWE Magazine**—and our **podcast series, Diverse**. **SWE's research site** provides current research, trends and stats on the state of women engineers in the workplace, in education and academia, and across the globe.
