

The Society of Women Engineers' **Community College Affiliate Support and Expansion (CCASE)** program aims to increase support for existing and the expansion of new Community College Affiliates in the United States. To do this, SWE will directly support professional development and outreach activities through financial and membership incentives. In doing so, SWE will encourage more women in community colleges, especially those underrepresented with extraordinary financial situations, to pursue a STEM degree.

Through the CCASE program, active Community College Affiliates can apply for a one-year \$350 project stipend to conduct professional development and outreach activities and receive five (5) Collegiate-to-Career (C2C) memberships. New faculty advisors may be eligible for discounted FY24 professional memberships.

The CCASE program is funded by the Amateur Radio and Digital Communications Foundation.

CCASE Program Requirements

- Current or newly-formed SWE Community College Affiliate
- Located in the United States
- Members who are interested in or pursuing a STEM degree
- Ability to receive and deposit funds in a bank account, ideally an individual who is your faculty advisor or treasurer.

Timeline

Application Opens: Rolling

Application Closes: December 1, 2023
